

**Press Release
December 17, 2015**

In its meeting on December 17, the MPC decided to reconvene on Thursday 24, 2015.

The CBE is keen on fulfilling its mandate of price stability for the purpose of sustainable economic growth and job creation. This mandate is only achievable through full coordination and commitment on macroeconomic objectives with the government, including targets for fiscal consolidation, current account outturns and the implementation of urgent structural economic reforms.

The CBE will discuss with the government these objectives during the first Coordinating Council meeting scheduled on December 17.
